"PROM – Short-term Academic Exchange" at the IGS PAS

The Institute of Geological Sciences of the Polish Academy of Sciences (IGS PAS) is implementing the project "PROM – Short-term Academic Exchange", financed by the Polish National Agency for Academic Exchange (NAWA) with co-funding from the European Union through the European Funds for Social Development 2021–2027 (FERS) programme.

Project Leader: Prof. Anna Wysocka, Deputy Director of IGS PAS for Research, phone +48 600 602 761, e-mail: anna.wysocka@twarda.pan.pl

Amount of funding: 995,250.00 PLN

Project duration: October 1, 2025 – September 30, 2026

Project objectives and target groups

The project aims to develop short-term academic mobility targeted at PhD students and research staff of the IGS PAS. With the support of the funding, participants will be able to take part in conferences, training courses, study visits, internships, and research consultations at renowned foreign institutions. At the same time, the Institute will host international students and PhD candidates who will participate in scientific workshops and study visits organized in the form of summer and winter schools at three IGS PAS centers.

Project outcomes

The implementation of the project will contribute to:

- increasing the number of international mobilities,
- developing the research and teaching competencies of the participants,
- strengthening cooperation with international scientific partners,
- enhancing the position of IGS PAS in the international scientific community.

Structure and scope of activities

The project activities are based on two main pillars:

- 1) Active participation of IGS PAS researchers and PhD students in international initiatives – including conferences, research projects, and scientific internships.
- 2) Organization of study visits and workshops for international participants, conducted by the Institute's research teams.

As part of the project, a series of thematic schools and workshops will be held, covering topics such as seismic, metamorphic process modelling, paleolimnology and paleoecology, as well as experimental microbiological research.

Sustainable development and equal opportunities

The project is implemented in the spirit of sustainable development, with full respect for the principles of equal opportunities and non-discrimination.
